L<sup>A</sup>T<sub>E</sub>X is great for equations, as can be seen in equation 1.

$$P(A|B) = \frac{P(B|A) P(A)}{P(B)} \quad (1)$$

### 2.1 Subsection with a dummy figure and table

Citation (Hermanson and Lahunta, 2020; Petersen-Jones, 2005). Petersen-Jones (2005) can be cited also as part of the text, or just print the names Petersen-Jones or the year 2005. A footnote displaying how to include urls<sup>1</sup> in text. Below is a simple example figure 2.1. Table 2.1 is on the top of the next page.

## 2.2 Another subsection

Here we have some subfigures side by side to demonstrate the captioning style settings in figure 2.2. You can reference the subfigures independently too: 2.2a and 2.2b. Some space before the figure can be added like this.

**Figure 2.2:** Kitty and dogo. Much wow.

You can also use a newline with `\\` or `\newline` to add vertical space. Commands are not processed in this verbatim environment.

### 2.2.1 Sub-subsection

This and the following subsections 2.2.2 and 2.3 demonstrate different lists.

Itemize:
